CONFIDENTIAL

AET-100 AUTHENTICATION

All authentication starts with the Alpha at the top left of the grid.
The second letter is always selected vertically (going down).
The third letter is always selected horizontally (going right).
The correct response letter is the one below the third letter
The example above would be as follows:

"Authenticate ALPHA-HOTEL-DELTA"
the response should be:
"I authenticate CHARLIE"

RAMROD AUTHENTICATION

RAMROD is a 10 letter word where none of the letters appear twice.

To authenticate, the challenger selects two letters in the authentication code, one each side of the letter required for correct response - the correct response is the letter bracketed by the two letters included in the challenge.

For example using the word COMPLEXIFY, you challenge by saying:

"Authenticate PAPA-ECHO"
the response should be:
"I authenticate LIMA"
